---

T—this egg abstract was **very** difficult to write—be gentle. V's seen it.

The OJ abstract is also attached, V wrote it, I've seen it and Gail's seen it.

Redacted

Candy is with the client (we're hoping they can do something with it—it's thin and clearly padded);

Redacted

Time is very limited next week = both of us (and I think V leaves on the 24);

Redacted

We got the comments back from Wahida, I've accepted her comments and will work on that article as much as I can, but this is shaping up as an incredibly busy weekend: **Redacted**  
I've got the breakfast talk to review and modify as needed—I mentioned  
the other breakfast papers, and study up on breakfast, so I can sound like I know what I'm doing. Cheryl will not be at the meeting, that is her last day at Kellogg's; I have the readings to do and  
travel arrangements to make for the dietetics summit meeting; and **Redacted**  
I have 52 exams to grade—and another set of staggered assignments coming in today, and my taxes to pull together. Today starts with 2  
classes and three meetings = bah.

Hope you're having a good time and finding something to do = perhaps you should take up bird watching.
